

NICHE REACH ENGINE

Your next audience is already on Instagram

A managed Instagram growth service built around your niche.

Great content needs visibility

**Posting is only part
of growing.**

Your content can deserve attention and still struggle to reach people beyond your existing followers.

Niche Reach Engine focuses on introducing your profile to audiences with interests connected to your brand.

Targeting built around your niche

We research where your potential audience is already active.

01 Accounts and engagement

Audiences drawn from relevant account followers and people liking related content.

02 Topics and locations

Keywords, hashtags and places provide additional targeting options for your campaign.

For a film actor, audience research can include related actors, entertainment communities and talent organizations.

How the program works

01 Audience research

We select relevant audience sources based on your profile and campaign goals.

02 Targeted activity

The system views stories and likes relevant content to create opportunities for profile discovery.

03 Response tracking

We review the followers and incoming likes the dashboard attributes to each target.

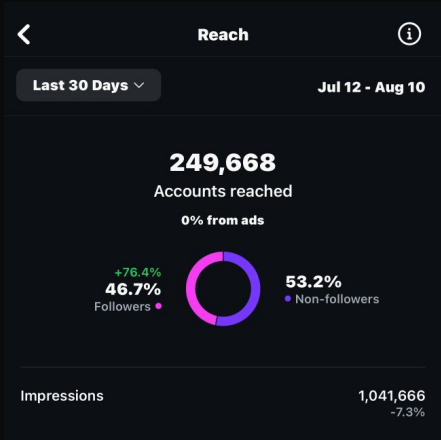

04 Targeting refinement

Audience response informs which sources we prioritize and adjust as the campaign progresses.

Before joining. After the program.

Before joining / 30 days

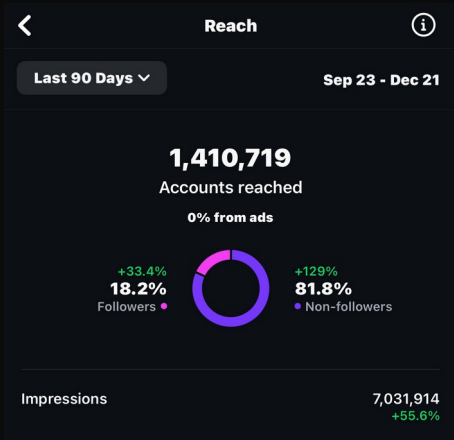

July 12–August 10, 2025

Accounts reached	249,668
Impressions	1,041,666
Non-follower reach	53.2%
Avg. impressions / day	34,722

After joining / 90-day program

September 23–December 21, 2025

Accounts reached	1,410,719
Impressions	7,031,914
Non-follower reach	81.8%
Avg. impressions / day	78,132

+465% total reach / +575% total impressions / +125% impressions per day

Totals compare 30 days before joining with 90 days in the program. Daily averages divide impressions by days. Both report 0% reach from ads. Client identity withheld. Results vary.

Results by audience source

Monthly results reveal which targets bring a response.

01 Monthly source results

New followers and incoming likes attributed by the dashboard to each audience target.

02 Daily activity tracking

Daily actions and incoming results tracked separately, so activity volumes stay distinct from outcomes.

We use source performance alongside Instagram Insights to evaluate the campaign and inform targeting decisions.

Your 90-day campaign

90 days

Campaigns begin on the first of the month.

Service tier and investment depend on your profile, goals and campaign scope.

Your campaign includes

- Niche audience research
- Targeted activity and campaign management
- Monthly results by audience source

We review dashboard source results alongside available Instagram reach, profile visits and follower growth.

Let's talk about your audience

Who should be discovering your profile?

Tell us about your brand and the audience you want to reach. We'll discuss fit and an appropriate campaign scope.
